

Just Make Surveillance Reconstruction Simple

Bandwidth
100M

Coax Cable
1200m

Network
Cable
700m

UTP7301EOC-A1 (dedicated to elevator)

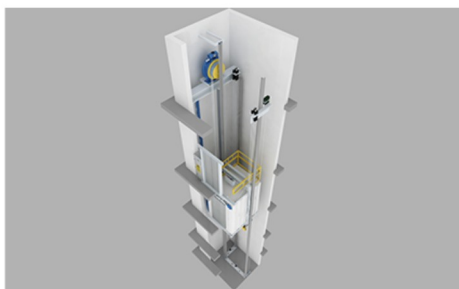

- Fluent HD signal transmission in elevator;
- Up to 1.2km super long transmission distance;
- Good cable compatibility;
- Excellent anti-interference ability;

FEATURES

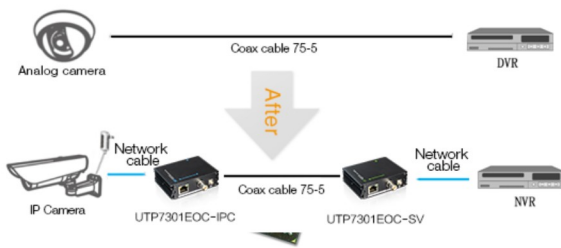

1 Application in Elevator

Use accompanying cables to transmit HD IP signals; Features long transmission distance, excellent anti-interference, etc.

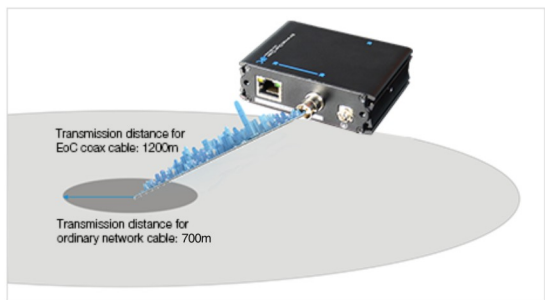

2 Upgrading Project

Analog surveillance upgrading to HD IP Surveillance; Widely used in project of security surveillance with coax and network cable mixed, also in project of network rebuilding.

3 Extended Distance

Long network signal transmission; up to 1200m via coax cable; up to 700m via network cable; less than 1ms latency; support point to point application.

4 Superior Performance

Superior circuit isolation protection, lightning protection, ESD and anti-interference ability.

5 Simple Operation

Plug and play, no setting required.

Elevator IP Surveillance Transmission Solution
